Product Launch

MET DoForce

MET DoForce

A versatile Direct Diode source for laser-assisted heating of metals. Our MET DoForce module has been designed for tailored-property parts manufacturing for designed crash-performance in the automotive industry. It excells in life-time duration, reliability, efficiency and robustness and impresses through its higher working distance (> 150 mm) and depth of field.

Applications

- Material Processing
- Heat treatment

Wavelength:	940 nm (other wavelengths on demand)
Working distance (WD):	> 165 mm
Electro-optical efficiency:	> 55%
Beam spot size (2 individually addressable stacks per module):	40 mm x 34 mm
Beam spot size (up to 5 modules in total):	200 mm x 34 mm
